

28 October 1960

Col. Frederick O. Diercks  
Commanding Officer  
Army Map Service

Dear Colonel Diercks:

At our last meeting, I mentioned that we were preparing a briefing paper on the problems of adequate target information for guided missile operations. The attached paper has been prepared for the non-technical reader to highlight the essential elements of the problem including a comparison of U. S. and Soviet capabilities.

Since the paper has been prepared for internal CIA use only, I would appreciate discriminate use of it in your organization.

Your comments on it would be useful and appreciated.

Sincerely yours,

25X1A9a

  
Chief, Geographic Research
